Student's Qualification

Student's by Region

“This is exactly what I needed and what most people would benefit from in my opinion, the type of information given is simplified yet condensed, covering everything from the basics to the technology, implementation, and managerial aspects. The interactive course really helped with the flow of information between each other. Many thanks to the organizer, it was awesome!” — Ralph K.

“The course is designed with very specific tools and techniques for making the job in electroplating industry to be understood easily. You need a very basic knowledge of chemistry before understanding the concepts dealt in the course. The topics have been covered in enough depth and length to show a way to look for opportunities in the existing process.” — Kumar A.

STUDENTS HAD 100% SATISFACTION UNTIL NOW

“This is to thank you and Advint for offering a very comprehensive industrial electroplating course. The training that I received under your guidance would definitely prove to be beneficial in my future career and the journey ahead. The course not only covers the technical aspects of electroplating, but also teaches the students and early professionals the business development methodology and to get the most out of the resources in hand. The concepts of electrochemistry were very well explained. Talking about the electroplating field, everything from A to Z was well explained. The knowledge and experience of Mr. Venkat would benefit each and every individual to delve deeper into the subject. Moreover, his patience and calmness was something remarkable. From the beginning of the course, the candidates have the sense of freedom to freely and openly ask questions. The E-Book is something which each and every person in this field would want to read in order to achieve a better understanding of the subject. A very intensive book, which I would benefit from throughout my career. In the end, I would say that I am glad that I could start my journey in this vast industry under the leadership and mentorship of Mr. Venkat.” — Kartik J.
